

Proof of Concept, Inc.

REFINING CONCEPTS DEFINING SUCCESS

CONCEPTUALIZATION AND RAPID PROTOTYPING INDUSTRIAL SERVICES

Proof of Concept, Inc. is a multi-faceted company which can provide conceptualization and rapid prototyping services for our Industrial clients. Three areas we are currently covering include: ARCHITECTURAL, INDUSTRIAL LIGHTING, AND CONSUMER PRODUCTS.

ARCHITECTURAL

Architectural and landscape models built in 3D and printed using our Zcorp Rapid Prototype machine give scale presentations more life and allow for a high level of detail and resolution. These models can also be printed in color.

INDUSTRIAL LIGHTING

Industrial boutique lighting boasts a high level of customization and unique design for its customers. The need for quality casting models is paramount. Our 3D models provide an economic and precise method for creating these masters in a way not possible with manual processes.

CONSUMER PRODUCTS

Consumer products range from sporting goods, to figurines, to energy efficient cars. More and more companies are realizing they can control development costs by utilizing quality models for review and analysis before investing in tooling. Our 3D Rapid Prototypes give these companies the advantage they need.

These Industrial Service examples show the versatility of Proof of Concept, Inc. and its prototyping processes. For more information regarding these processes and our many other capabilities please contact our President directly:
