

FOOTWEAR PRODUCT REALIZATION SERVICE SHEET
LAST DIGITIZING

**FEATHER EDGE
LAST**

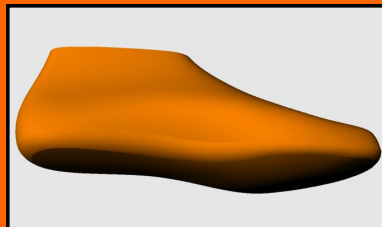

Traditional Last with hard edge along last bottom surface.

**HALF FEATHER/
HALF RADIUSUED
LAST**

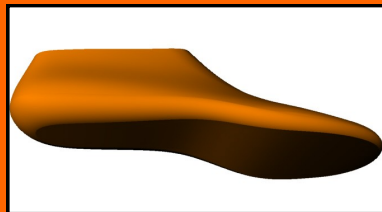

Hybrid Last featuring traditional edge along forefoot and large radius contours in heel.

**FULL RADIUSUED
LAST**

Specialty Last with variable radius along the entire last bottom.

SANDAL LAST

Anatomical Last heavily contoured in heel, arch, and forefoot areas. May also feature toe placement ridges.

We also digitize Boot, Dress Shoe, and Fashion Lasts on a per quote basis.

Lasts are digitized and then reverse engineered using NURBS surfaces. 3D Last Files are available in Rhino (.3dm), IGES (.igs), and STEP (.stp) formats. Specialty formats can also be generated upon request.

2D LAST TEMPLATE

Each digitized last includes a 2D Last Template for use in design layout and conceptualization of new projects. The 2D Last Template features generic construction lines to keep overall shapes and appearance to scale. The 2D Last Template is available in Adobe Illustrator (.ai), AutoCad (.dxf), and Rhino (.3dm) formats.
